A COMPLETE BATHROOM SOLUTION

www.dciindia.in

WHY PVD FINISH ?

PVD finish or coating, is short for Physical Vapour Deposition coating. It is a high-tech vacuum deposition process where the coating material transfers on a single atom or molecule level, which provides an extremely pure and high-performance coating.

It is four times harder than chrome which makes it corrosion and scratch resistant. PVD coatings give products a beautiful finish that is highly resistant to scratches and scrapes.

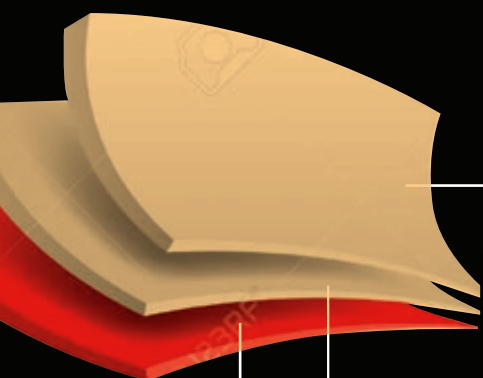

GREAT ADHESION, RESISTANCE AND DURABILITY

SINCE 1994

LET'S MEET WIDEST FAUCETS RANGE..

EXCELLENT QUALITY FAUCETS WAIT
FOR YOUR PICKUP.

The physical vapor deposition technique is called PVD. This state-of-the-art process creates a molecular bond that makes the faucet the most durable available on the market.

STRINGENT QUALITY CONTROL

DCI employs a large Quality Control (QC) team at manufacturing locations. Products must confirm to strict quality standards. Every piece of DCI ware is inspected for pin-holes, micro-cracks & color consistency.

BEST QUALITY INTERNAL PARTS

Single-lever & Thermostatic cartridges along with Aerators form the heart of any faucet. DCI sources these parts from the best manufacturers. Each faucet handle passes the open-&-close test for 500,000 operations.

LUXURY MADE AFFORDABLE

DCI is on a mission to bring luxurious products to India at affordable price points. We supply directly to limited showrooms across India. Cost-savings are gained through our efficient adoption of latest warehouse management systems and advanced supply-chain capabilities.
